Details Reverse Side

NFPA 1850 sets a new standard for cleaning and decontamination, but complying doesn't have to be complicated. Ready Rack® simplifies the entire process with purpose-built solutions. Our Decon Ready™ solutions prepare your gear, specialized extractors deliver the enhanced cleaning and decontamination required, and versatile drying cabinets ensure thorough drying without compromising the structural or thermal integrity of your PPE. Get the comprehensive, compliant equipment you need to easily master this standard.

## DECON READY™ DECONTAMINATION SOLUTIONS

Go beyond clean. Decon Ready™ uses science-based formulas to reduce harmful carcinogens, including VOCs, PAHs, and heavy metals, trapped in your PPE. Protect your crew's health while keeping gear service-ready.

## SOFT-MOUNT EXTRACTORS FOR TURNOUT GEAR AND PPE

Ready Rack's EW22G, EW35G, and Smart-Wash Series extractors deliver NFPA 1850-compliant cleaning power to help extend the life of your PPE and safeguard your crew's health. The EW22G and EW35G extractors offer easy installation, standard 120V power and plumbing connections, and preprogrammed wash cycles. With drum sizes for 4 to 6 pieces of turnout gear, they're ideal for most stations.

For advanced performance and durability, the Smart-Wash Series features compact, freestanding designs, a 180° door swing for easy access, a 5-compartment detergent dispenser, and preprogrammed wash cycles. Built for efficiency and precision, these units are fully compatible with automatic soap injection.

Achieve consistent results with peristaltic dosing pumps, available in single and double options, to automate every wash.

## SMART-DRY DRYING CABINETS

Smart-Dry Cabinets deliver NFPA 1850-compliant care with programmable controls, built-in overheat protection, and advanced humidity tracking to gently dry gear while preserving fabric integrity. The Smart-Dry 4 accommodates up to four full sets of gear with Dry Kwik hangers and ventilated shelves. The Smart-Dry 6 uses six specialized Air Flow Coat Hangers to dry garments inside and out simultaneously, reducing energy use and extending gear life.

## VORTEX DC2 DRYING CABINET

Boost efficiency and protect the integrity of high-performance FR fabrics with the Vortex DC2 Drying Cabinet. Designed for versatility, it handles turnout gear, boots, gloves, and hoods with ease. Temperature sensors, pre-set cycles, and a standard 120V connection make setup simple and operation effortless.

## VORTEX MD5 MOBILE DRYER

The versatile Vortex MD5 Mobile Dryer offers five upright drying positions designed for turnout gear, dive, rescue, hazmat suits, and more. Built with heavy-duty casters and locking brakes, it delivers easy mobility and rock-solid stability, so you can dry gear wherever it's needed. Smarter technology and enhanced versatility make it the go-to solution for fast, efficient drying.

Exclusions apply: Pre-existing orders and products not listed above. All orders must be received by Groves Inc. by end of day Tuesday, June 30th, 2026 to qualify for the promo pricing. All orders must ship by Friday, July 31st, 2026. Groves will not hold or delay shipping orders with promo pricing past the final shipping date of July 31, 2026. The only exception for Groves to delay shipping past the final shipping date is if Groves cannot fulfill the order at that time.
