# PARTS

Shelving

Divider panel

Divider panel top

Hanging pole

Posts

Back ledge

Split sleeves

Label holder

Stem Casters with Brakes

Stem Casters

Rubber Mallet

Self grippers

Bunker pant hook

Hanging grommet (HWGR)

## ALL PARTS SHOWN BELOW:

- Divider panel
- Divider panel top
- Shelving
- Posts
- Shelf grippers
- Split sleeves
- Back ledge
- Hanging pole
- Label holder
- Hanging grommet
- Stem casters
- Stem casters with brake

## HARDWARE NEEDED:

- Rubber mallet

## STEP 1

Attach casters to the open end of the 74" tall posts (four posts per unit). Put caster stem into the post and tap in with rubber mallet.

## STEP 2

Next you will need to attach your split sleeves to the bottom of the posts with the lines matching up. Make sure the split sleeve is in the same position on all four posts.

## STEP 3

You can now run your post through the holes on the bottom shelf. Move the longer end of the posts through the shelf first for the split sleeves to function properly.

## STEP 4

Once finished, you can stand up your rack and make sure the shelf is secure against the four posts by tapping the shelf with a rubber mallet.

## STEP 5

Measure 64 inches from the top of the bottom shelf to the top of the next split sleeve. This will ensure that your top shelf is level and at the proper height for the divider panels. Once you finish, you can place the top shelf on your rack. Tap the shelf with a rubber mallet to ensure it is secure.

## STEP 6

You are now ready to install your divider panel. Remove the top portion of your divider panel. *The space between these will match with the model purchased. \*If you purchased an 18-inch model they will be 18 inches apart, just as if you got a 24 inch model they'll be 24*

## STEP 7

Once you're sure your divider panel is straight, you can now put the top on, securing it to the rack.

## STEP 8

Add two shelf grippers to the top and bottom, as shown. This will secure your divider panel to the shelf. Repeat this step for the rest of your divider panel.

## STEP 9

Take your hanging pole and slide it through the top middle section of the divider panel just below the top shelf. Slide your hanging hooks on to the hanging pole and space them out evenly. Now connect the hanging hooks to the top shelf.

*\*\*When using multiple hanging poles, use the pole connector to bring them together and make one continuous hanging pole. Take one nut of the pole connector and hammer it into one end of the pole. Take the other nut and hammer it into the end of the adjoining pole. Insert the threaded bolt into both nuts and twist to bring together.\*\**

## STEP 10

Attach the 4 inch back ledges to both shelf levels by sliding the wire bottoms over the quarter inch truss wire.

## STEP 11

The last step is putting on the label holders and bunker pant hooks
